The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1 to 30 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 to 12 of U.S. Patent No. 6,344,083. Although the conflicting claims are not identical, they are not patentably distinct from each other because the differences between the instant claims and the patented claims are the pressure and gas content. However, in the absence of unexpected results, it would have been obvious to one of ordinary skill in the art to determine through routine experimentations the optimum, operable gas content and process conditions in the patented claims in order to control the insoluble gas content while not introducing impurities into the melt by have pure gases.

Claims 1 to 30 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 50 to 72 of copending Application No. 09/943,600. Although the conflicting claims are not identical, they are not patentably distinct from each other because the difference between the claims is the evacuation of the chamber. However, in the absence of unexpected

results, it would have been obvious to one of ordinary skill in the art to determine through routine experimentations the optimum, operable means to remove the unwanted gas in the chamber prior to filling the chamber with the wanted gases.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
